Description: How does your gender and sexual identity define you? Find out in this guide for identity fluidity in the 21st century.

The soul, when not in human form, is a being of light and energy. It has no gender and no sexual orientation. Therefore, gender and sexual identities are constructs of incarnation created for learning purposes. The question, then, is why did each of us choose our specific gender and sexual orientation for this lifetime?

This book offers fresh perspectives on gender and sexual identity, including biological, sociological, and psychological influences with an emphasis on spiritual impacts. Included are new concepts about gender fluidity and alternative sexual orientations. The author draws on years of research and

personal experience to create the broadest perspective of gender and sexual identity compiled in one volume.

Gender and sexual identity are two of the most basic but powerful aspects of our personal identity. These are the bedrocks upon which we build our self-concept and the lenses through which we view the world. Labels are not important but self-identity is critical to self-empowerment. This book illustrates how our identities are not set at fixed points but lay along ever-shifting continua. Here you will discover:

- How gender and sexual identities are created and why.
- How gender and sexual identities change throughout one lifetime or over multiple lifetimes.
- Theories on why a soul chooses its gender and sexual identity when incarnating.
- Introduction of the Energy Body.
- The history and mythology of Two Spirit and Third Gender cultures around the world.
- The real story of a “boy named Sue”: the author’s life as a Four Spirit.

In *Soul Sex*, the author offers a buffet of perspectives on gender, sexuality, and identity. You are invited to sample each of the dishes as food for thought.

If you have questioned your gender and sexual identity or if you have *never* questioned your gender and sexual identity, this book is for you. This book is also for individuals who want a deeper understanding of gender and sexual identities, individuals who are improving their self-empowerment through identity ownership, individuals who are exploring identity fluidity, and students of gender and sexuality studies.

Fluidity is the new identity of the 21st century.

Acceptance is the new morality.

Self-empowerment is the new mantra.

About the Author: Drake Bear Stephen is a Transpersonal Hypnotherapist and a Shamanic Energy Medicine Practitioner. He specializes in Past Life Regression Therapy.
